Numbers & Oddities

a.k.a. The Spooks Newsletter

Edition #209, February 2015

Editor: Ary Boender email: udxf@udxf.nl

Numbers & Oddities <http://www.numbersoddities.nl>

"Numbers & Oddities" a.k.a. the "Spooks Newsletter" is a newsletter for the members of the Utility DXers Forum (UDXF), the Spooks mailing list, HF Underground and everyone else who is interested in Numbers Stations.

"Numbers & Oddities" covers the fascinating world of Numbers Stations and other odd radio signals on shortwave.

Hi and welcome to yet another N&O newsletter. Except for a frequency for the buzzer (S28) and new channel marker for S5292, nothing special happened in February.

I recently found a very nice website that might be of interest to you. It is the Listeners Guide which also includes some utility recordings and a number of war time recordings: <http://www.listenersguide.org.uk>

I'd like to start with an item about the Russian military command stations. Each month I receive a couple of questions about these stations and their messages. I hope that the following item gives the information that you're looking for. I will put this info also on the N&O website.

RUSSIAN MONOLITH STATIONS

The radio stations of the Russian Central Military Command are using priority codes and message formats from the Soviet days. They are described in the following document:

МИНИСТЕРСТВО ОБОРОНЫ СССР
РУКОВОДСТВО ПО РАДИОСВЯЗИ
ВООРУЖЕННЫХ СИЛ СССР

Ministry of Defense
RADIO GUIDE
Soviet Armed Forces

Часть 2

part 2

ПРАВИЛА РАДИОСВЯЗИ
*Введено в действие директивой
Генерального штаба Вооруженных Сил СССР
от 19 мая 1986 года № 177/24/0945*

RADIO REGULATIONS
*Enacted Directive
General Staff of the Armed Forces of the USSR
on May 19, 1986 № 177/24/0945*

The priority codes are described in chapter 1 of this document:

9. По важности и категориям срочности информация делится на следующие виды:
сигналы боевого управления и оповещения; радиограммы категорий срочности «Монолит», «Воздух», «Ракета», «Самолет», и «Обыкновенная».
Сигналы категории срочности «Воздух» передаются вне всякой очереди после передачи всех видов сообщений категории срочности «Монолит».
Радиограммы различных категорий срочности передаются в такой последовательности:

«Монолит» - с перерывом передачи и приема сообщений всех других категорий срочности;

«Воздух» - после радиограмм категорий «Монолит» с перерывом передачи и приема радиограмм категорий срочности «Ракета», «Самолет» и тегорий срочности «Ракета», «Самолет» и «Обыкновенная»;

«Ракета» - после радиограмм категорий «Монолит», «Воздух» с перерывом передачи и приема радиограмм категории срочности «Самолет», и «Обыкновенная»;

«Самолет» - после радиограмм категорий «Монолит», «Воздух», «Ракета», с перерывом передачи и приема обыкновенных радиограмм.

Радиограммы категории срочности «Обыкновенная», передаются после радиограмм категории срочности «Самолет» в порядке их поступления.

При работе по открытому радиоканалу проставленная на радиограмме категория срочности кодируется по Таблице дежурного радиста или другим установленным порядком.

При работе с использованием международных позывных категория радиограммы передается открыто в сокращенном виде: «Монолит» (мнл), «Воздух» (взд), «Ракета» (ркт), «Самолет», (смл) и т. Д.

The priority codes are used both in full and shortened form.

Long form	Short	English	Description
Монолит / Monolit	mnl	Monolith	The most urgent level, interrupts all traffic
Воздух / Vozdukh (Wozduh)	vzd (wzd)	Air	Interrupts all message types except Monolit
Ракета / Raketa	rkt	Rocket	Interrupts Samolet and Obyknovennaya messages
Самолет / Samolet	sml	Airplane	Interrupts Obyknovennaya messages
Обыкновенная / Obyknovennaya		Regular	

The format of the messages is fully explained in chapter2 of the document. The document “Rukovodstvo-Radiosvazi-SSSR.pdf” (in Russian) can be downloaded from the N&O website.

These flash messages are similar to the US NMCC Emergency Action Messages (EAM’s). They are transmitted in voice, Morse and RTTY by Army, Navy and Air Force stations.

The most common format is: Callsign of the receiver xx xxx code word xx xx xx xx

Example: MDZhB 19 186 DIASPOR 62 47 13 50

Note that the callsign of the receiver is often a circular callsign, like MDZhB. They are used to call all stations in a certain area or to call stations that belong to a certain command chain. When a specific station is called then the callsign belongs to that specific station is sent. Example: KARTA-11 98 255 KONOVID 5620 4081.

Morse flash messages begin with “XXX XXX”. Examples: XXX XXX WEGI WEGI 70709 50277 KLOPOMOR 3277 2208 K and XXX XXX 1QRF 1QRF 52004 AMFIOBENY 8207 4863 ANALOJNYJ 3557 3950 K

STATIONS

In radio hobby circles the Russian Central Military Command stations that transmit the above mentioned priority codes and flash messages are called **Monolith stations**. Some of these stations are well known to many people while other stations are not often logged. Below the list of the most reported voice stations.

Nick name Designator *)	Callsign	Circular callsign	Frequency	Location
Buzzer (S28)	Vulkan	MDZhB	3216, 4625	St. Petersburg and Moscow
Pip (S30)	Kaplya	8C1Shch	5448 (daytime) 3756 (nighttime)	Rostov-na-Donu
Squeaky Wheel (S32)			3828 (nighttime) 5473 (daytime)	Probably Rostov-na-Donu
None (MX)	channel marker “R”	Plovets-41	4325.9 channel marker 4325 voice messages	Possibly Ekaterinburg
None (S6930)		Katok-65	6930, 3218.5	
None (S5426)		Arbat-50	5426	
None (S4292)	channel marker “B”	Fazan-37	5292 voice messages 5292.3 channel marker	DFs point to a location NE of St Petersburg
None (S5790)		Patron-79	4790	

*) Designators were assigned by ENIGMA, ENIGMA 2000, Priyom, Numbers & Oddities

G06

4484 kHz, 02-02, 1800 UTC

G06 starts with "248 248 000" instead of "248 248 248 00000" and stops.

Then Russian Air Force station Korsar pops up:

Opora50, Ya Korsar71

Kak prinimaeti menya?, primayau vas na 2 balla (How to you hear me? Hear you 2 points)

G06 comes back and mixes with the Air Force.

Shpora50 Ya Opora50 priyom, drugaya chastota!!!

Shpora50 I'm Opora50 priyom, other frequency!!!

The recording, made by Avare, is available from the N&O website.

S5292

Frequencies: 5252 kHz USB (voice)

5292.3 kHz CW (channel marker)

On 10 February the first report came in about a new channel marker on 5292.3 kHz. During the first two weeks It transmitted combinations of "B" and "D", probably because of technical problems. After that only "B" is transmitted.

So why the marker? Usually a marker is used to occupy an important frequency. So far, this station was not very active. Maybe the marker is the beginning of a more tasks/messages. The Russian military are very active in N.E. Russia. The Barents Observer reports that the air force is building a new airport on Franz Josef Land which is an uninhabited archipelago in the Arctic Ocean. The navy is expanding its activities and new S400 missile sites near the borders to Norway and Finland were installed; and in November 2014 Russia played nuclear war-games in Barents Region. This could very well be related to the new channel marker.

V13 - New Star Broadcasting Station

星星廣播電台 Xīngxīng guǎngbò diàntái

Frequencies: 7654, 7688, 8300, 9276, 9522, 9725, 10182, 10522, 11430, 13750, 15388 kHz

Partly unconfirmed new schedules. Please let us know if you hear the station.

15388 kHz	0200-0230 UTC	New Star 1	11430 kHz	0700-0730 UTC	New Star 4
15388 kHz	0300-0330 UTC	New Star 1	11430 kHz	0800-0830 UTC	New Star 4
15388 kHz	0400-0430 UTC	New Star 2	7502 kHz	1200-1230 UTC	New Star 4
11430 kHz	0500-0530 UTC	New Star 3	7502 kHz	1300-1330 UTC	New Star 4
11430 kHz	0600-0630 UTC	New Star 3			

New Star 1 was reported on 15388 kHz at 0200 and 0300 UTC.

New Star 4 was reported on 11430 kHz at 0800 UTC

VC01 - Chinese Robot **Chinese Air Defense**

Modes: USB and LSB

The station changes its frequencies frequently. Known frequencies:
